Contents

Chapters	Page No.
1. Pyelonephritis <i>(Dr. K. Arun Chand Roby, Dr. C. Madhavi Latha and Dr. M. Sreenivasulu)</i>	01-14
2. Acquired Immuno-Deficiency Syndrome <i>(Dr. K. Arun Chand Roby, Dr. C. Madhavi Latha and C. Lalitha)</i>	15-37
3. The Role of Artificial Intelligence in Neurology <i>(Dr. S Manju and N Thamaraikannan)</i>	39-56
4. Epigenetic Modifications and CRISPR-Cas9: Opportunities and Challenges in Gene Editing <i>(Andrea Garrido-Mendoza, Minerva Lorovico Daya, Yakubu Magaji Yuguda, Meenakshi Saravanan and Shivam Kumar)</i>	57-68
5. Knee Arthritis and Total Knee Replacement (TKR) <i>(Dr. Manjit Kumar)</i>	69-92
6. Data Privacy in Healthcare: Protecting Patients' Rights <i>(Kritika Munjal, Aanchal Sharma, Ishita Rana and Dr. Sahil Thakar)</i>	93-106
7. Biosensors for Healthcare: A Short Review <i>(Dilsar Gohil, Varun Singh Saggi, Cyril Sajan, Falakaara Saiyed, Rajesh Maheshwari and Kinjal Patel)</i>	107-117
8. A Short Review on Catatonia Syndrome <i>(Cyril Sajan, Varun Singh Saggi, Prem Prajapati, Neha R. Gulati, Dilsar Gohil, Foram Bhatt and Elizabeth Jacob)</i>	119-128
9. Adrenoleukodystrophy: A Metabolic Disorder <i>(Varun Singh Saggi, Cyril Sajan, Rajesh Hadia, Nirmal Shah, Dilsar Gohil, Rajesh Maheshwari and Hemraj Singh Rajput)</i>	129-141

Chapter - 1

Pyelonephritis

Dr. K. Arun Chand Roby, Dr. C. Madhavi Latha and Dr. M. Sreenivasulu

Abstract

Pyelonephritis is a sudden and severe kidney infection which causes the inflammation of kidneys and may permanently damage them. It may be life threatening. It is a bacterial infection of the kidneys where in most of the cases it can be cured without causing long lasting renal damage. It can be severe and is usually quite painful and few patients need to be hospitalized. In acute pyelonephritis small dot like structures can be found which are called as "ABSCESSSES". Complicated pyelonephritis includes pregnant patients, patients with uncontrolled diabetes, kidney transplants, urinary anatomical abnormalities, acute or chronic kidney failure, as well as immunocompromised patients and those with hospital-acquired bacterial infections. It is a Life-threatening kidney disease which destroys the skin muscle tissue leading to the renal infection which is characterized by the production of gas in kidneys.

The goal of treatment is to control the infection and reduce the symptoms usually resolve within 48-72 hours after appropriate treatment.

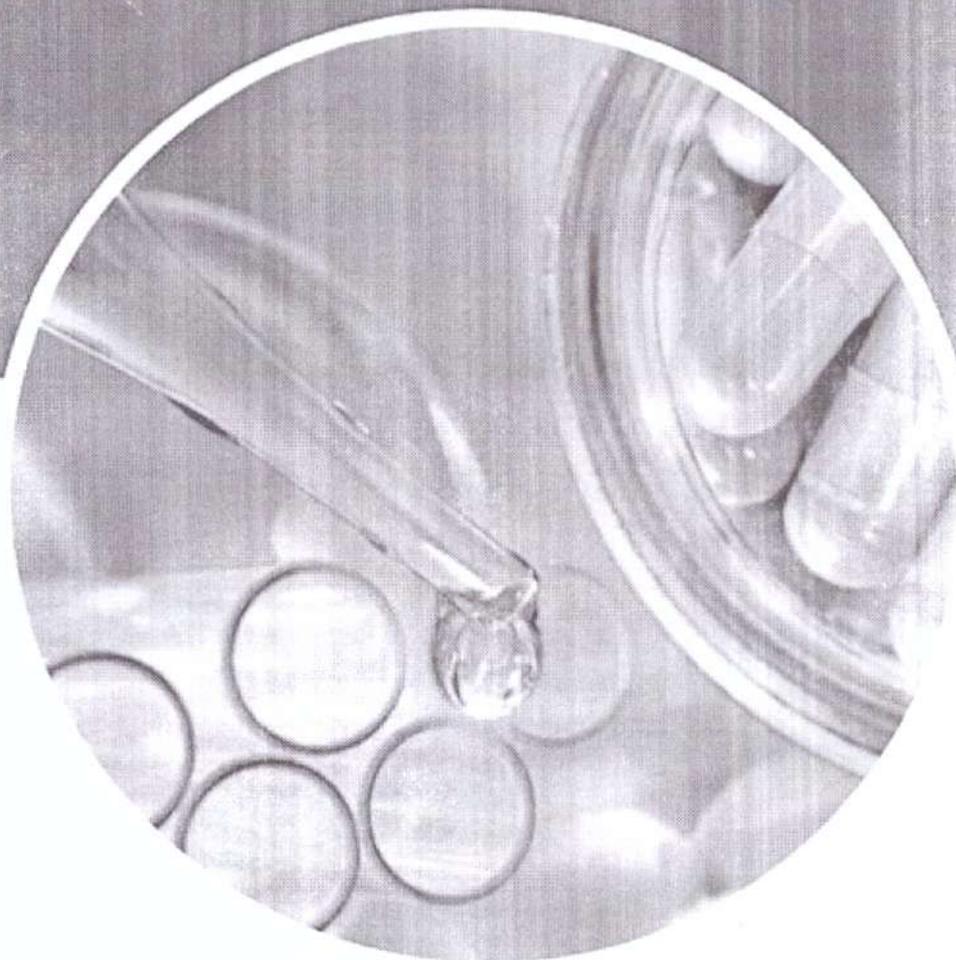

Oral or IV Fluids, antipyretics, pain medications and a dose of parenteral antibiotics are generally referred as the treatment for pyelonephritis.

Antibiotics are the first line therapy for pyelonephritis. The antibiotics are generally given for 14 days but the patients who are receiving Fluoroquinolone and Ciprofloxacin the treatment can be shortened to 7 days.

Although the drugs can cure the infection within 2-3 days but the medication must be taken for entire 14 days.

Keywords: Pyelonephritis, emphysematous pyelonephritis, xanthogranulomatous granulomatous pyelonephritis, penicillin's, amoxicillin clavulanate potassium, cephalosporin's, trimethoprim sulfamethoxazole

A TEXTBOOK OF PHARMACEUTICAL ANALYSIS

Dr.M.Sreenivasulu, Mrs.Prabhavathi, Mrs.Maneesha, Ms.Ch.Sakhinamma

M. Sreedevi
PRINCIPAL

Contents

Preface Contributors

1. Form Selection of Pharmaceutical Compounds
2. Preparation of Drug Samples for Analysis
3. High-Performance Liquid Chromatography
4. Mass Spectroscopy in Pharmaceutical Analysis
5. Ultraviolet-Visible Spectroscopy
6. Immunoassay Techniques
7. Applications of Capillary Electrophoresis Technology in the Pharmaceutical Industry
8. Atomic Spectroscopy
9. Luminescence Spectroscopy
10. Solid-State Nuclear Magnetic Resonance Spectroscopy
11. Vibrational Spectroscopy
12. Statistical Considerations in Pharmaceutical Process Development and Validation

A handwritten signature in green ink, appearing to be "Ratnam".

1. Solubility of Drugs	1.1 - 1.32
1.1 Introduction	1.1
1.2 Solubility Expressions	1.2
1.3 Mechanisms of Solute Solvent Interactions	1.5
1.4 Ideal Solubility Parameters	1.6
1.5 Solvation	1.7
1.6 Association	1.8
1.7 Quantitative Approach to the Factors Influencing Solubility of Drugs	1.9
1.8 Diffusion Principles in Biological Systems	1.11
1.9 Solubility of Gas in Liquids	1.12
1.10 Solubility of Liquids in Liquids	1.14
1.10.1 Binary Solutions	1.14
1.10.2 Ideal Solutions	1.15
1.11 Raoult's Law	1.17
1.12 Real Solutions	1.21
1.13 Partially Miscible Liquids	1.21
1.14 Critical Solution temperature and its Applications	1.22
1.15 Distribution Law	1.26
1.15.1 Limitations of Distribution Law	1.29
1.15.2 Applications of Distribution Law	1.29
• Exercise	1.30
2. States and Properties of Matter and Physicochemical Properties of Drug Molecules	2.1 - 2.78
2.1 States of Matter and Properties of Matter	2.1
2.1.1 States of Matter	2.1
2.1.2 Changes in the State of Matter	2.5
2.1.3 Latent Heat	2.6
2.1.4 Vapour Pressure	2.7
2.1.5 Sublimation	2.11
2.1.6 Critical Point	2.12
2.1.7 Eutectic Mixtures	2.13
2.1.8 Gases	2.14
2.1.9 Aerosols	2.22
