

7.1.2: The Institution has facilities send initiatives for

1. Alternative sources for energy and energy conservation measures
2. Management of the various types of degradable and non degradable waste
3. Water conservation
4. Green campus initiatives
5. Disabled - friendly, barrier free environment

Response:

1. The institution has facilities for alternate sources of energy and energy conservation measures. LED bulb: In our campus 100 % of lighting source comes from LED bulbs. LED lights are energy/efficient long-lasting, and emit less heat. They use up to less energy than incandescent bulbs, last up to 40 times longer, and offer high quality light output.

Solar Panel: Solar energy is a renewable energy source and reduces carbon missions it offers healthier environment and clean air though the reduction of green house gas emissions. It reduces electricity bills. Supreme Solar has installed a 1,500 KW on grid solar roof top power plant as a move towards reducing carbon footprint and global warming.

2. Management of the following types of degradable and non degradable waste

Our institute has taken several measures in maintaining a clean and green campus with eco friendly policies such as

- Solid waste management.
- Liquid waste management
- Biomedical waste management.
- E-waste management of Hazardous Chemicals and
- Radioactive Waste Management

Solid Waste Management: The institution carefully monitors effective management of solid waste in the campus making sure that bins are provided separately for dry and wet waste at every corner of the corridor at wash rooms. Empty chemical bottles! Reagent containers are disposed on a regular basis. Awareness programmes are organized on waste management. To sustain eco-friendly and green enabled campus various NSS programs like Swatch Bharat, Clean & Green activities and plantation in campus are regularly conducted.

Liquid Waste Management: The institution channelizes waste water from all the laboratories to underground channels for disposal.

Biomedical Waste Management: Animal waste in pharmacology laboratory is disposed in deep pits which are covered and closed with thick layer of earth. Biomedical waste is collected transported and disposed by Ratnam UNIT I.

E-Waste Management: The waste generated from obsolete electronic equipment! Computer monitors, CPUs, and other E-waste is collected by "EESHAN ENERGY" who undertake recycling activities. Remaining wastes are disposed of through Municipal agency.

Hazardous Chemicals and Radio active waste Management

Crockery and broken glassware of any sort is considered hazardous waste and are disposed appropriately. Hazardous chemicals used in the labs are diluted and safely flushed out of reach of the students. Faculty monitors the students for careful use and handling of hazardous chemicals.

Exhaust fans are installed to remove noxious gases from all the laboratories. Fuming chamber

DRY AND WET WASTE

3. Water conservation facilities available in the institution:

1. Rain water harvesting
2. Borewell / open well recharge
3. Construction of tank sand bunds
4. Waste water recycling
5. Maintenance of water bodies and distribution system in the campus

5. The institution has disabled-friendly, barrier free environment
 - i. Built environment with for easy access to classrooms.
 - ii. Disabled friendly washrooms
 - iii. Signage including tactile path, lights, display boards and signposts
 - iv. Assistive technology and facilities for persons with disabilities (divyangajan) accessible website, screen reading software, mechanized equipment
 - v. Provision for enquiry and information: human resistance, reader, scribe, soft copies of reading material, green reading

Creating disabled-friendly facilities in institutions is essential to ensure accessibility and inclusion for individuals with disabilities. Therefore, at AMRMCP we provide accessible entrances and exits with ramps and sloped pathways. Lift facility is provided to reach all the floors. Accessible restrooms are maintained.
